the book comprises of selected papers presented at the third international conference on intelligent manufacturing and automation icima 2022 which was organized by the departments of mechanical engineering and production engineering of dwarkadas j sanghvi college of engineering djsce mumbai jointly with indian society of manufacturing engineers isme the book

focuses on specific topics of intelligent manufacturing automation advanced materials and design it includes original research articles focusing on the latest advances in the fields of automation mechatronics robotics cad cam cae cim fms in manufacturing artificial intelligence in manufacturing iot in manufacturing product design development dfm dfa fmea mems nano technology rapid prototyping computational techniques nano micro machining sustainable manufacturing industrial engineering manufacturing process management modelling optimization techniques crm mrp erp green lean agile manufacturing logistics supply chain management quality assurance environment protection advanced material processing characterization and composite smart materials it is hoped that the contents in the book will serve as reference for future researchers the book is also expected to act as a valuable resource for the students of post graduate and doctoral programmes

the ifac tc on manufacturing modelling management and control mim was founded on the ifac world congress sydney 1993 the goals of this workshop concerned the development comparison and classification of formal models in the field of computer integrated manufacturing systems in a descriptive as well as prescriptive way computer integrated manufacturing systems are able to integrate optimization methods simulation models procedures and knowledge based tools the target for the workshop activities were related to the specification of requirements for new models which are used in simulating and designing manufacturing management and control strategies including discrete event and continuous representations technical areas of interest at the system level included tools for plant layout design process planning production planning and control technical areas of interest at the component level included models for functional description of flexible manufacturing and assembly systems oriented to production activity control process supervision and maintenance

there is at present no universally accepted source giving definitions in english of the principal terms used in production control and in closely related areas most of the dictionaries and glossaries which do exist in this field fail to cover the full range of

ideas which need to be considered during an intelligent discussion of the subject definitions given in different sources for production control terms differ not only in wording but also in many cases in the concepts which they cover the ifip glossary is intended to meet this perceived need the immediate audience for the book being ifip wg 5 7 the working group concerned with the automation of production management and other related subjects the glossary is organised in the following way the subject field was classified into sub fields by management function each of these sub fields was analysed to discover the main concepts with which it is concerned terms were selected for each concept using as far as possible terms which are already in common use definitions were selected or written for each term this approach of starting with subject classification is believed to be new in the field of production care has been taken to check the glossary with the apics dictionary usa and with british standards notes are included in part 2 to explain the reasons for selecting a particular meaning for a term in those cases where there are wide differences in the meanings chosen by different sources some consensus about the meaning of words is essential for communication on the other hand there is a danger that if the accepted framework of meanings is too rigid if may hinder the future development of the discipline it is hoped that a reasonable balance has been found between these conflicting influences the glossary should be useful not only to wg 5 7 members but also to engineers and academics in all countries where a knowledge of english is important to industrial development
